Professional Summary

Senior DevOps Engineer with around 7 years of experience specializing in GitOps architecture, Cloud Cost Optimization (FinOps) and Security (DevSecOps). Proficiency extends to major cloud provider AWS. Certified in Kubernetes both as an application developer and administrator (CKA, CKAD).

Technical Skills

- **Cloud Provider:** AWS
- **Infrastructure as Code (IaC):** Terraform
- **Containerization and Orchestration:** Kubernetes, Docker, Docker Compose
- **Continuous Integration/Continuous Delivery (CI/CD):** ArgoCD, Github Actions, Jenkins
- **Version Control Platform:** GitHub, Code Commit
- **Service Mesh:** Istio
- **Monitoring and Alerting:** Prometheus, Grafana

Experience

Cognizant Technology Solutions

Senior DevOps Engineer

Pune, India
Oct' 24 – Present

Experienced Senior DevOps Engineer managing end-to-end deployment, infrastructure, and service operations for a major life sciences client. Skilled in automating workflows, optimizing CI/CD pipelines, and ensuring high availability of critical applications in compliance-driven environments. Proven track record of driving efficiency, reliability, and scalability across cloud solutions.

- Ensuring infrastructure compliance with industry standards through rigorous monitoring, access controls, and audit-ready documentation.
- Automated repetitive operational tasks using scripts and infrastructure-as-code tools reducing manual effort by over 50%.
- Optimized cloud resource utilization and implemented cost-saving measures, leading to 24% reduction in yearly cloud spend.
- Redesigning cloud architecture to reduce operational costs and simplify complexity
- Played a key role in refining and evolving the architecture for improved scalability, resilience, and performance across environments.
- Imported existing cloud services into Terraform to improve manageability and state tracking.
- Leveraging Wiz to provide direct visibility, risk prioritization, and remediation guidance for development teams to address risks in the current infrastructure and applications so they can ship faster and more securely
- Simplifying authentication mechanism with the implementation of OIDC concept throughout the projects.
- Collaborating with cross-functional teams to simplify complex product solutions, enhancing maintainability and reducing operational overhead.
- Authored Terraform modules for infrastructure management. Authored and published a module to the internal Terraform registry for other teams to use for deployment.
- Utilized AI to streamline and provide the seamless delivery.
- Enhancing existing AWS services (Lambda, Glue, RDS, S3) to improve performance and reliability.
- Planned and implemented terraform throughout project, completed import for existing services.
- Maintaining infrastructure compliant by upgrading services periodically which helps in tightening security and extended support charges.

Tech Mahindra Limited

DevOps Engineer

Noida, India

Aug' 22 – Oct' 24

Worked as a DevOps Engineer, responsible for managing end to end deployment lifecycle of the product with the help of several tools to minimize the human error and automate the processes.

- Performed end-to-end deployment lifecycle as a DevOps professional, leveraging various tools for process automation and error reduction.
- Introduced Jenkins, ArgoCD, and Helm to establish a comprehensive CI/CD pipeline, enhancing deployment efficiency.
- Proficient in Kubernetes and Docker, optimizing deployment workflows.
- Spearheaded improvements in CI/CD pipelines to accelerate delivery cycles and reduce deployment-related errors.
- Implemented deployment of diverse microservices (React, Python, etc.), achieving a 60% reduction in deployment time through CI/CD workflow automation.
- Managed AWS cloud infrastructure, optimizing resource utilization, implementing auto-scaling, load balancing, and overseeing various AWS services (VPC, EKS, IAM, ECR, Code Commit, Lambda, API Gateway, S3, EC2, etc.).
- Designed and implemented infrastructure using Terraform and Ansible, resulting in a more reliable and scalable overall system.
- Used Terraform as a tool for building, changing, and versioning infrastructure safely and efficiently. Managed existing and popular service providers as well as custom in-house solutions.

Wipro Limited

DevOps Engineer

Bangalore, India

Jul' 19 – Aug' 22

Worked as a DevOps engineer. Responsible for managing and administrating clusters and deploying containerized application in Kubernetes/OpenShift.

- Implemented AWS Cloud platform and its features which includes Lambda, Code Commit, CloudFormation, CloudFront, API Gateway, SQS/SNS, S3, CloudWatch, EC2.
- Successfully created and deployed EKS Kubernetes cluster on AWS.
- Deployed staff facing application on internet with private access with the help of CloudFront and Ip whitelisting.
- Proactively worked and supported team with troubleshooting and managing the environments.
- Provided security expertise for cloud-based DevOps development and deployments.
- Managed Docker orchestration and Docker containerization using Kubernetes.
- Configured Helm to deploy applications in various environments.
- Created and deployed containerized applications on Kubernetes/OpenShift.

Certifications

- Claude Certified Architect
- AWS Certified Cloud Practitioner
- Certified Kubernetes Application Developer (CKAD)
- Certified Kubernetes Administrator (CKA)
- Certified HashiCorp: Terraform Associate

Education

Kanpur University (CSJM University)

Bachelors in Computer Application (BCA)

Kanpur

Jun' 16 – Jul' 19
